SUMMARY OF CONTENTS.

	PAGE.
FOREWORD
PART I.—GENERAL EDUCATIONAL TABLES FOR BRITISH INDIA, FOR 1926-27
PART II.—APPENDICES
PART III.—SUPPLEMENTAL TABLES

NOTE.—A detailed table of contents is affixed to each part.

FOREWORD.

The statistics given in this volume relate to British India, viz., the nine Governors' Provinces and the areas controlled or administered by the Government of India. In order to comprehend and interpret the figures included in the tables, especially those in Part III (Supplemental Tables), the following should be borne in mind: the figures for the North-West Frontier Province are included under those of the Punjab, of which it used to form a part, up to the year 1900-01; the figures relating to the eastern districts of Bengal are shown under Eastern Bengal and Assam from 1905-06 to 1910-11 and under Bengal Proper from 1911-12 onwards; the figures for Bihar and Orissa are included under those of Bengal up to the year 1910-11; similarly the figures for Delhi are included under those of the Punjab up to 1910-11. It will be observed from these facts that, owing to the frequent redistribution of the political divisions of British India, the provincial figures, especially those of Assam, Bengal and the Punjab, are not in all cases strictly comparable from year to year. The total figures for British India are, in the same way, not comparable with those of the previous years in some cases: the figures for Ajmer-Merwara, Baluchistan and Bangalore being included in the all-India totals for the first time with effect from 1916-17 and those for the "Administered Areas" in Indian States for the first time from 1925-26.

2. It has already been mentioned in Vol. I of the review that the forms of the General Educational Tables were altered with effect from 1922-23—the first year of the present quinquennium. In some cases, the calculations given in the new tables are not comparable with those given in the old tables. For example, the average annual cost per scholar was calculated formerly on the total expenditure and average number of scholars on the rolls monthly during the year; but the latter figures have been omitted from the new tables and hence the calculations are now made on the basis of the total number of scholars on the rolls on the 31st March each year. Further, the new tables do not contain information about the stages of instruction of male and female scholars separately: this defect, however, will be removed in future tables, the necessary alterations in the forms (Tables IV-A and B and V-A and B) having been made after the close of the quinquennium.

R. LITTLEHAILES,

Educational Commissioner with the Government of India.

Municipal Funds.

EXPLANATIONS.

1. *School Year*.—In these tables the school year is assumed to coincide with the financial year, i.e., to extend from April 1st of one year to March 31st of the next, though in actual practice some institutions, e.g., European schools, may close in December and others, e.g., colleges, in May.

2. *Recognised Institutions* are those in which the course of study followed is that which is prescribed or recognised by the Department of Public Instruction or by a University or a Board of Secondary and Intermediate Education constituted by law and which satisfy one or more of these authorities as the case may be, that they attain to a reasonable standard of efficiency. They are open to inspection and their pupils are ordinarily eligible for admission to public examinations and tests held by the Department or the University or the Board.

3. *Unrecognised Institutions* are those which do not come under the above definition of recognised institutions. They are for the most part indigenous institutions for education of a religious character.

4. *Other sources* include income from endowments, subscriptions, contributions, etc.

5. *Classification*.—In tables IV-A and IV-B, Class I represents the lowest class in the school, whether called infant class, sub-standard A or Class I. Where the number of school classes exceeds 10, the additional classes should be entered in the space left blank below X and numbered for the purposes of this table XI and XII.

6. *Intermediate colleges and examinations*.—An “Intermediate college” means an institution preparing students for admission to the degree courses of a University or for entrance into vocational colleges. The Intermediate examination means an examination qualifying for admission to a course of studies for a degree.

7. *European scholars* are included in the General Summary and General Tables II-A and B, IV-A and B, V-A and B, VIII and IX. The expenditure on European Schools is included in the General Summary and General Tables III-A and B. *Teachers* in European Schools are included in Tables VI-A and B.

8. All statistics refer to Recognised Institutions only, except where side-headings for Unrecognised Institutions are entered.

9. In Tables IV-A and B and V-A and B, the top-heading “Hindus” may be sub-divided into such necessary sub-headings as may be considered suitable in each province, e.g., “Higher castes” and “Depressed” or “Backward classes” or “Brahmins” and “Non-Brahmins” etc. [In the consolidated tables for all India, all Hindu scholars will, however, be entered in one column only.]

10. Table IX is prepared at the end of each Quinquennium and gives figures for the last year of the Quinquennium only.

11. In calculating the expenditure from Government, District Board or Municipal Funds, entered in Tables III-A and B and other expenditure tables, all payments or contributions from fees and other sources, which are credited to such funds, should be deducted.

APPENDIX II.

EDUCATIONAL BROADCASTING.

Activities of the British Broadcasting Corporation.

(Vide Chapter VI.)

The British Broadcasting Corporation, London, has done pioneer work in exploring the possibilities of wireless as a medium of instruction. In 1923, a committee was appointed by the company to advise on and to watch the progress of educational broadcasting in England. It was found that experiments with wireless lessons could be carried on in a number of schools. After an experimental series of broadcasts to schools in 1924, a regular daily series was begun. There is much divergence of opinion as to the place of the wireless lesson in the curriculum and as to the best lecturers and courses; nevertheless the educational activities of the B. B. C. in this new field are instructive and the following extracts are reproduced here for the benefit of Indian educationists.*

* For fuller information, reference may be had to "Educational Broadcasting" published by the Curragh United Kingdom Trustees, and "New Ventures in Broadcasting" (Report of the Hadow Committee).

(a) TRANSMISSION TO SCHOOLS.

Some thousands of schools are now listening regularly to these Transmissions to Schools, using them to supplement the ordinary curriculum. Little by little it is being discovered what range of subjects and what manner of delivery are best suited to the majority of listening schools, but experience has already shown that nearly every school is finding that one or more of the courses offered in our programmes is acceptable. Sometimes a course may be voted a failure by a class of girls, yet be listened to with enthusiasm by a class of boys in the same school. Sometimes one course may be too elementary for one class, yet prove definitely successful with a lower standard. As it is not possible for the B. B. C. to take the needs of individual schools into consideration, or suit the times of transmission to individual time-tables, it is often advisable that teachers should try different groups of children with a particular course before settling down to follow it, or adapt their own time-table so that it can include, as periods, the times of the wireless transmissions. We ask, however, that teachers should realise that both the courses and the timings have been arranged as far as possible to meet the convenience of the majority of schools. In order to facilitate the distribution of syllabuses, etc., schools are earnestly required to notify the B. B. C. that they are listening; giving full postal addresses, and particulars of the courses which they intend to follow.

Collaboration between wireless teacher and class instructor.

It is seldom enough merely to introduce the loud speaker into the schoolroom and urge the children to listen. The wireless teacher counts on children and teacher alike entering into the spirit of his lessons, and the class instructor will find that great benefit derives from a close collaboration with his wireless colleague. It is hoped that the latter's suggestions at the microphone, or contained in the special manuals and syllabuses relating to the different courses, will be adopted as far as possible. The class should be encouraged to respond during the lessons, by singing tunes, writing down dictated notes, answering questions, referring to maps, diagrams and illustrations, as the case may be. The teacher should use the black-board

as directed. Difficult words should be noted and afterwards explained. Whenever it is feasible, preparation or revision, or both, on the lines indicated in the pamphlets, should be taken with the class; excursions should be encouraged when desirable; illustrations and books should, if possible, be obtained. It is often found that the value of a wireless lesson is trebled if the class teacher can make time immediately afterwards to elicit by question and answer from the class, or by mere narration, an account of what they have heard, correct misapprehensions, elucidate difficulties, and finally get the children to apply their new knowledge to their ordinary work on the subjects, or to their own experience. It is of value to those responsible for developing school broadcasting that teachers in the schools should feel themselves to be in close touch with the wireless lecturers, reporting instantly any dissatisfaction with method or material, and communicating suggestions for improvement either direct, or through the B. B. C. during the term.

Written work.

Some sort of written work should undoubtedly follow most of the lessons. This may, if desired, be sent to the B. B. C. for correction and commendation at the microphone, but in no case must more than six papers be sent from any one school. A mere reproduction of the lesson from notes taken while it was being given, is not so valuable as an essay on some aspect of the subject dealt with, which requires individual research. On the other hand, children who have listened without taking many notes, may, very usefully, be encouraged to rebuild the lesson in their own words, either verbally or on paper. At the end of each course a short examination is held on the work of the term, for which prizes are awarded. This is by no means an integral part of the system of Transmission to Schools, but is at present felt to be necessary in order that some idea may be obtained of the effectiveness of the different courses.

Manuals and Pamphlets.

In connection with almost all our courses there will be issued in September either a manual for use by individual scholars, or an illustrated syllabus. In the case of the French and music manuals it is *essential* that every scholar should possess his own copy and use it according to instructions. No manual will cost more than 1d. per copy, and single specimen copies will be sent free on receipt of 1½d. stamps. It is hoped that teachers will make the very fullest use of these pamphlets. Any suggestions for improving them will be most gratefully received.

Reception.

So far as school broadcasting is concerned, GOOD RECEPTION is a *sine qua non*. The voice of the speaker must sound clear and natural, otherwise the attention of the children is hard to fix, and they soon become tired or bored. Reception is only up to standard when a class of thirty or forty children can listen to the lessons without strain.

If difficulty is experienced in attaining this standard, teachers should write to the B. B. C. and explain what their difficulties are. Advice and assistance will be given by post, and in extreme cases, when nothing can be done locally, visits from our advisory engineers will be arranged. It is impossible, however, to cover all requests for visits, so that teachers, if they themselves are lacking in technical knowledge, are advised to make some definite arrangement with a local expert for the maintenance and periodical overhauling of the school set. In this connection the B. B. C. issues free explanatory booklets. Full information regarding the general lay-out of sets suitable for use in schools, together with specifications for two-, three- and four-valve sets, may be obtained on application.

A tuning note followed by a short reading is broadcast five minutes before the school programme starts each day, and it is hoped that all

teachers will use the reading in particular for the purpose of tuning in their set to the voice of the speaker. If this is not done, the first part of the lesson may be lost while adjustments are being made or faults located.

The room in which wireless lessons are taken should be as far removed from street and playground noises as possible.

(b) WIRELESS DISCUSSION GROUPS.

During the past winter experiments in the running of wireless discussion groups have been undertaken in about sixty different centres in England. Reports have been received at headquarters from many of these centres, and, although it is still too early to make conclusive statements, some of the evidence received is unexpectedly encouraging. Everyone at first sight finds the *idea* of wireless discussion groups attractive, but a certain amount of scepticism follows when the difficulties of these groups appear more clearly. Several of the experiments referred to have undoubtedly proved failures, but there remains a substantial surplus of enthusiastic reports, and these suggest that what failures there have been are due to a misconception of how to form and run discussion groups.

To begin with, let us consider how such groups ought *not* to be run. Experience seems to show that wireless discussion groups will not spring from nowhere, *i.e.*, groups of adults will not leave their homes and gather round a loud-speaker in a school or some public building to which they are not accustomed. In such cases wireless has the disadvantages of the class room without the corresponding advantages. Nor, again, can one expect that wireless group listening will appeal much to students in the adult education movement who are devoting their energies to hard work in classes.

(i) *Types of Discussion Group.*

Clearing these out of the way, then, we have the following types of discussion group which this winter's experience has shown to be successful:—

1. *Voluntary Organisations.*—Wireless discussion groups may spring up as a supplement to the activities of some other organisation, either educational or social. Where people are in the habit of frequenting particular premises, often with recreational aims, they may dislike formal education and yet be attracted by the informality and briefness offered by wireless group-listening. The kind of institutions where one would expect to find these possibilities include Young Men's Christian Associations, Clubs, Village Institutes and Reading Rooms, technical and other colleges, Adult Schools, juvenile organisations, etc. A number of these institutions possess receiving apparatus often used for entertainment purposes only. Among the many members of such bodies there are sure to be several who would find it interesting to follow this or that series of talks, if they were brought to their notice and if arrangements could be made to give them at a suitable time the use of a room and loud speaker. Consultation with the secretary of such institutions is the most effective way to explore this possibility.

2. *Special Organisations.*—There are many occasions on which groups of individuals get gathered together not entirely of their own choice, *e.g.*, in prisons, workhouses, hospitals, reformatories, or again in recreation rooms and rest rooms connected with their place of work. The successful experiment which has been conducted at Wormwood Scrubs Prison shows the possibilities of big developments here. The Home Office has also taken up the question of making experiments with the Schools under their care, which include a large number of adolescents.

3. *Individual Listening and Group Discussion.*—Group discussion, it should be remembered, is possible even when group listening is not. Many of the Women's Institutes for instance report to us that al-

though they are unable to form listening groups in connection with the regular meetings of their institutes, the publicity given through the distribution of the Talks Programme leads small groups of their members to listen on their own sets at home and afterwards to discuss the contents of the talks among themselves. Again, a large number of people belong to societies (dramatic, musical, literary and social) which meet at times or in places unsuitable for wireless reception. Nevertheless, these people have a group spirit through the organisation to which they belong and this group spirit can be utilised (with the assistance of an energetic secretary) in the following way. Among the broadcast courses of lectures there are sure to be, from time to time, some which have a particular interest for the members of this or that society, e.g., a series of talks on drama for dramatic society, a series of talks on this or that social subject for trade unionists and co-operators. If proper publicity is given, the members of these societies can be encouraged to follow the talks individually on their own sets at home, and afterwards they would have opportunities through their society to meet together in larger numbers to exchange ideas and criticisms. There are also some bodies which have still got the lecture habit, i.e., arrange programmes of single lectures for their members during a winter session; examples of this are men's and women's co-operative guilds, local literary and scientific societies and so forth. Efforts should be made to induce such bodies to include occasionally in their programme a broadcast talk by way of a change. Some of the poorer societies would welcome this, as they rely principally at present upon voluntary lecturer.

4. *Wireless as an aid to Adult Class Work.*—Wireless courses will undoubtedly be found useful to adult students attending formal classes (e.g., in the W. E. A. or in technical or other evening institutes), in supplementing their studies of particular subjects. The aim here should be to bring the Talks Programmes and Aids to Study pamphlets to the notice of the tutors and lecturers of such classes, and get them to introduce the matter in their class work. The students of the classes can then be urged to listen to the wireless talks in question at home, and to discuss them with the class tutor or their fellow students afterwards. Or group listening may take place during, and as part of the class-period.

5. *Fireside Groups.*—There is also the fireside group, for which there may be even a bigger future than the foregoing. Here the family listens together, or hospitality is extended to a few friends or neighbours who drop in to listen and discuss. This should be particularly popular in villages and out of the way places, wherever a neighbourly spirit prevails. Such groups will arise usually on the initiative of one person, e.g., a village teacher or doctor or person. Examples would probably be found in the tea-parties organised under the auspices of the Mothers' Union. The difficulty here will be that many such fireside groups have arisen, and will arise, without the B. B. C. knowing of their existence, owing to their informality.

It will be seen from the above that there is a great variety of experiment possible with the discussion group idea. People interested require to have the various possibilities suggested to them, and also some sort of instruction as to how to run such a group. Among the bodies which offer the greatest likelihood of success with one or other of the above suggestions are: Adult Schools and Brotherhoods; Young Men's Christian Associations; Settlements and Guildhouses; Technical Colleges and Evening Institutes; Co-operative Guilds (Men's and Women's); Women's Institutes; Mothers' Union Branches; W. E. A. branches; University Tutorial Classes; Whitley Councils; Working Men's Clubs (especially in Midlands and the North); Local Musical, Dramatic and Literary Societies; Girls' and Boys' Clubs; Business Firms with Welfare Schemes; League of Nations Union branches; Organisations for the Blind.

(ii) *Subjects suitable for Discussion Groups.*

It is not likely that discussion groups will spring up in connection with all the subjects of the adult education talks. Roughly speaking

these courses fall into two kinds (a) more popular, not intended for discussion purposes, (b) more advanced, which are intended for discussion purposes. Some subjects do not lend themselves to discussion. For instance many scientific subjects, literature talks, and purely informative talks. In each session there will usually be five or six courses suitable for discussion groups. On the whole, social subjects are likely to be the most successful though there is some evidence that technical subjects may also prove successful with a different class of student. It is worth adding that successful experiments have been made with introducing the language talks, i.e., French, into the teaching of French classes. Probably this idea has a future before it as all over the country there are students attending French classes taught by Englishmen who might be glad to introduce Monsieur Stéphan's twenty minutes as an interlude in a two hours class. Discussion groups may also spring up around other than the purely educational talks, e.g., international affairs round Mr. Vernon Bartlett's talks; on music, around Sir Walford Davies' talks. In the case of women, according to the Mothers' Union, they are quite likely to group themselves around such subjects as the Household talks, or any series which has to do with Travel.

(iii) *Conduct of Discussion Groups.*

In giving advice how to run a discussion group, allowance must be made for the variety of circumstances indicated above, but there are certain essential points on which direction is necessary.

(a) *Necessity for a Group Leader.*—Someone is required who will take the initiative in forming the group, seeing that it is comfortable and ensuring that the discussion runs smoothly. It is no doubt helpful if this group leader can be a person of some education and qualification, even if he is no expert in the subject of the course. In default of a qualified person there are any number of students in adult education classes who have been trained to express themselves and who would come forward if encouraged. The idea could be put before such students at summer schools, in students' unions, at Universities, etc. The group leader should be responsible for seeing that contact is kept between the Group and the B. B. C. and if possible, some sort of report at the end, sent up.

(b) *Reception Problems.*—No group ought to put up with inferior receiving apparatus. Every group that is discouraged or spoiled by bad reception is a bad advertisement for broadcast education. Groups should be informed of the technical advice and help which can be given by the B. B. C. Advisory Schools Engineers. Students and others, however, are naturally shy of writing to the B. B. C. and they require encouraging to build up the necessary contact.

(c) *Publications.*—It is essential that every group should avail itself of the Aids to Study pamphlets, and from headquarters every effort will be made to get these pamphlets published earlier, and to improve and simplify the bibliographies in these pamphlets. As each group or organisation may require several copies of the same pamphlet some arrangements about bulk orders will become necessary in time. The individual subscription scheme (mentioned in Radio Times) for these pamphlets also requires greater publicity.

(d) *Procedure of Groups.*—Wherever a discussion group is held it is essential to shut out all interruption once the talk has begun, and to ensure that no extraneous noises, such as scraping of chairs on floors, take place to interrupt it. As a rule the meeting is best called for some few minutes before the talk, in order that the members of the group may be reminded of what has gone before. It should always be arranged beforehand who is to open the discussion; if no one can do this the group can try reading out the questions suggested by the lecturer, and discussing them.

(e) *Correspondence, etc.*—Some member of the group should be asked to note any points raised during the discussion which are worth referring to the lecturer. If these are posted at once to the Adult

Education Section at Savoy Hill they can usually be dealt with in time for the next meeting. In some cases members of a group or society may be enthusiastic enough to write down their thoughts on paper. This is really worth doing, and several societies have already tried the experiment of encouraging their members by offering prizes for the best papers written in connection with the wireless courses. If this idea were more widely known, probably many societies would do something of the sort.

It will thus be seen that there are very varied opportunities in each locality of trying out the wireless group discussion idea. The best course might be to get this memorandum discussed by local bodies interested, *e.g.*, the W. E. A. or by local Station Adult Education Advisory Committees where they exist.

APPENDIX III.

MEDICAL EDUCATION.

Miscellaneous matters.

[Vide Section (iii) of Chapter VIII.]

Seventh
Congress of the
Far Eastern
Association of
Tropical
Medicine.

The Seventh Congress of the Far Eastern Association of Tropical Medicine was held in India in 1927 after the close of the quinquennium. The previous Congresses were held in Manila 1910, Hongkong 1912, Saigon 1918, Welterreden 1921, Singapore 1923, and Tokyo 1925. The objects of the Association are the promotion of the science and art of medicine in the Far East; the union of the medical profession of the Far East into one compact organisation; the development and diffusion of scientific knowledge; the promotion of friendly international intercourse between scientific men, etc. The membership of the Association is open to all medical practitioners, dentists and veterinarians, licensed by their home governments and the scientists working in the sphere connected with medicine and hygiene. His Excellency the Viceroy is the Patron of the Association in India, and its Vice Patrons are His Excellency the Commander-in-Chief, the Governors of the various Presidencies and Provinces in India, the Rulers of Indian States, the members of His Excellency the Viceroy's Executive Council and His Excellency the Naval Commander-in-Chief. The Director-General, Indian Medical Service, is the President of the Association in India, the Vice-Presidents being the Public Health Commissioner with the Government of India, and the Director, Central Research Institute. Representatives of China, Japan, Korea, Formosa, Netherlands, East Indies, Philippine Islands, Siam and various other places in the Far East attended the Congress. The provinces in India were all represented by delegates. The United States of America delegated two representatives to attend the Congress. The Government of India invited as special guests:—

Sir Ronald Ross, K.C.B., K.C.M.G., F.R.S.,

Sir Malcolm Watson, Kt., LL.D.,

Sir Leonard Rogers, C.I.E., F.R.S.,

Professor Theodore Madson,

Professor J. W. W. Stephens, F.R.S.,

Sir Walter Fletcher, K.B.E.,

and Dr. Victor G. Heiser of the Rockefeller Foundation, United States of America acted as Honorary Adviser to the Council.

In all there were 1,215 members of the Association in India.

Medical Relief
for Women.

The health organisation for women in India has greatly progressed in the past few years. In the early days of medical relief for women in India the work was carried on practically exclusively by Missionaries. In 1833 a Fund was established in Bombay for the supply of medical aid to women and the committee of management engaged two fully qualified English medical women for a period of three years. A hospital was built through the generosity of a Parsee gentleman and the local Government undertook to support it. This hospital—the Cama—was the first in India, other than Mission hospitals to be staffed solely by women; it is still one of the largest, best equipped and best staffed, hospitals in India, and is entirely a Government institution.

Countess of
Dufferin Fund

Since then the Countess of Dufferin's Fund and the National Association for supplying female medical aid to the women of India was founded under the Countess of Dufferin. The Fund was founded in

1885, and has since then continued to work for the objects for which it was founded, namely, medical tuition, medical relief and the supplying of nurses and midwives for hospital and private work. The plan followed in the working of the Fund was that of a Central Committee at the Capital, to which was entrusted general management of the affairs of the Fund, while in the various provinces local committees were established which were allowed power to manage their own affairs and funds, but which were affiliated to the Central Committee.

Medical tuition was carried out by the Fund by granting scholarships to young women willing to take up the profession of medicine. Medical relief absorbed the greater part of the Fund's money and the attention of its committees. The creation of the Fund at once brought about a great improvement in the numbers of medical women working in India and to some extent in the qualifications of the workers. The Fund acted as a sort of agency in securing the services of medical women, nurses and midwives for the various hospitals and dispensaries throughout the country. It also engaged qualified doctors in England and brought them out at the Fund's expense for posts in India. The operations of the Fund continued in this manner up to the time when the Women's Medical Service was formed and administered by the Fund.

The formation of the Women's Medical Service for India was the outcome of several factors, among which was the general opinion shared by the central and local governments and by the Dufferin Council Committees that, in spite of the efforts of the Dufferin Fund, the needs of the women of India were not being sufficiently met. A Women's Medical Service for India was accordingly instituted with an initial cadre of 25 members, admitted by selection and recruited both in India and England. All members were required to possess medical qualifications registrable in the United Kingdom. The Service was originally under a medical woman as General Secretary, later superseded by a Chief Medical Officer, Women's Medical Service.

Women's
Medical Service.

In 1920 the cadre of the Service had to be raised. In 1925 an important step was taken by the formation of the Training Reserve. This gives the power to admit eight women graduates in medicine of Indian Universities to a Reserve, who ordinarily serve for four years before being admitted to the Women's Medical Service. But admission to the Reserve does not of itself constitute a claim to appointment to the Service. By its provision the Women's Medical Service was enabled to receive into the cadre selected graduates of Indian Universities and to help them to gain further experience abroad. The cadre at present consists of 44 members *plus* a Training Reserve of 8 members.

APPENDIX IV.

AGRICULTURAL LITERATURE.

[Vide Section (v) of Chapter VIII.]

The following text books on Indian Agriculture and allied subjects were published during the Quinquennium:—

1. *Cane Sugar*.—A text-book on the agriculture of the sugarcane, the manufacture of cane sugar and the analysis of sugar-house products, by Noel Deerr, Second Edn. (Norman Rodger, London).
2. *Jute in Bengal*, by N. C. Choudhry (W. Newman & Co., Calcutta).
3. *Co-operation in Germany, Italy and Ireland*, by M. L. Darling, (Government Press, Lahore).
4. *Agricultural Progress in Western India*, by G. Keatinge (Longman Green & Co., London).
5. *Manual of Dairy Farming*, by B. K. Ghare.
6. *The Foundations of Indian Agriculture*, by H. M. Leake (W. Heffer & Sons).
7. *Poultry Farming in the East*, by Mrs. A. K. Fawkes (Pioneer Press, Allahabad).
8. *Practical Botany for Indian Students*, by Diwan Bahadur K. Rangachariar (Government Press, Madras).
9. *Birds of an Indian Garden*, by T. Bainbridge Fletcher (Thacker Spink & Co., Calcutta).
10. *Crop Production in India*, by A. Howard (Oxford University Press).
11. *The Punjab Peasant in prosperity and debt*, by Mr. L. Darling (Oxford University Press).
12. *Agricultural Co-operation in the British Empire, with an introduction*, by Sir Horace Plunkett (Geo. Routledge, London).
13. *Kitak Shastra*.—Manual of Entomology (in Marathi), by V. G. Deshpande.
14. *Some diseases of cattle in India*.—A Hand-book for stock owners (Revised Edition), (Government Printing, India, Calcutta).

In addition, several bulletins of common interest and educational value have been issued by the departments of agriculture in the various provinces.

SUPPLEMENTAL TABLES.

PART III.—SUPPLEMENTAL TABLES.

I.—GENERAL STATISTICS.

	PAGE.
1. Area and population, by provinces	101
2. Distribution of population by sex, race and creed	102
✓ 3. Educational institutions in British India	104
✓ 4. Pupils attending educational institutions in British India	105
✓ 5. Expenditure on education	106
6. Summary of progress during the quinquennium	107
7. Institutions by management	108
8. Institutions by standard of instruction	109
9. Scholars classified according to institutions by management	110
10. Scholars classified according to institutions by standard of instruction	111
11. Scholars in recognized institutions classified according to race or creed	113
12. Scholars in recognized institutions classified according to stages of instruction	114
✓ 13. Percentages of scholars to total population, by provinces	116
✓ 14. Expenditure on education, by sources	118
✓ 15. Expenditure on education, by objects	120
16(a) Number of boarders, reading in recognized institutions, by management	122
16(b) Number of boarders, reading in recognized institutions, by institutions	123

II.—UNIVERSITIES AND ARTS COLLEGES.

✓ 17. Statistics of Universities in India	124
✓ 18. Results of examinations in Arts and Science of Indian Universities	134
19. Results of examinations conducted by provincial Boards of Education	135
20. Number of undergraduates in institutions controlled by provincial Boards of Education	136
✓ 21(a) Number of University graduates	137
21(b) Number of University undergraduates	138
22. Results of examinations at conclusion of secondary and intermediate courses	139
✓ 23. Classification of University students by race or creed	141
✓ 24. Classification of Arts students, by stages of instruction	142
✓ 25. Average annual cost of educating an Arts student	144

III.—SECONDARY SCHOOLS FOR BOYS.

26. Secondary schools for boys	145
27. Increase in secondary schools (for boys) and scholars in them	146
28. Secondary schools for boys, by management	148
29. High schools for boys, by periods	150
30. Middle English schools for boys, by periods	151
31. Middle vernacular schools for boys, by periods	152
32. Race and creed of pupils in secondary stage in schools for boys	153
33. Distribution of pupils between secondary schools for boys under public and private management	154
✓ 34. Expenditure on secondary schools for boys, by sources	155
✓ 35. Average annual cost of a secondary school for boys	157

III.—SECONDARY SCHOOLS FOR BOYS—*contd.*

	PAGE
✓ 36. Average annual cost of educating a pupil in a secondary school for boys	158
37. Average annual fee per pupil in secondary schools for boys	160
38. Grants-in-aid to secondary schools for boys	161
39. Number and qualifications of teachers in secondary schools of all kinds	162
40. Proportion of trained and graduate teachers in secondary schools	163

IV.—PRIMARY SCHOOLS FOR BOYS.

41. Primary schools for boys, by periods	164
42. Primary schools for boys, by management	165
43. Pupils in primary schools for boys, by periods	167
✓ 44. Average number of pupils in a primary school for boys, by periods	168
✓ 45. Expenditure on primary schools for boys, by periods	169
✓ 46. Expenditure on primary schools for boys, by sources	170
47. Expenditure on primary schools for boys, by management	172
48. Average annual expenditure on primary schools for boys, by management	173
✓ 49. Percentage of expenditure on primary schools from public funds	174
✓ 50. Average annual cost of educating a pupil in a primary school for boys	175
51. Average annual fee per pupil in primary schools for boys	176
52. Average annual fee per pupil in a primary school for boys, by periods	177
53. Average annual fee per pupil in primary schools for boys, classified according to management	178
54. Number and qualifications of teachers in primary schools of all kinds	179

V.—PROFESSIONAL EDUCATION.

(a) TRAINING OF TEACHERS.

55. Number of teachers, by provinces and institutions	180
56. Qualifications of teachers, by provinces	181
57. Training colleges, for males	182
58. Training schools for males	182
59. Training institutions for males and scholars in them, by management	183
60. Scholars in training institutions for males, by race or creed	185
61. Training institutions for females and scholars in them	186
62. Training institutions for females and scholars in them, by management	187
63. Scholars in training institutions for females, by race or creed	189
64. Total expenditure on training colleges	190
65. Expenditure on training schools for males	191
66. Expenditure on training schools for females	192

(b) LEGAL EDUCATION.

67. Law colleges and schools, scholars in them and expenditure	193
--	-----

(c) Medical Education.

68. Government Medical Colleges and expenditure	194
69. Medical schools and expenditure	195

(d) ENGINEERING EDUCATION.

70. Government engineering colleges and schools, with expenditure	196
71. Government agricultural colleges and expenditure	197

VI.—INDUSTRIAL AND COMMERCIAL EDUCATION.

	PAGE.
72. Technical and industrial schools, by periods	198
73. Technical and industrial schools, by management	199
74. Expenditure on technical and industrial education, by sources	200
75. Schools of art	201
76. Commercial schools, by management	202
77. Expenditure on commercial schools, by sources	204

VII.—FEMALE EDUCATION.

78. Institutions for the education of girls, by management	205
79. Girls under instruction in all institutions, by periods	206
80. Distribution of girls under instruction between girls' schools and boys' schools	207
81. Girls under instruction in institutions for general education	208
82. Girls under instruction in institutions for vocational and special education	210
83. Girls under instruction in different classes of institutions, by periods	212
84. Girls' colleges, by management	214
85. Girls' high schools, by management	215
86. Girls' middle schools, by management	216
87. Girls' primary schools, by management	217
88. Expenditure on recognized institutions for girls	218
✓ 89. Expenditure on recognized institutions for girls, by periods	219
90. Expenditure on schools for general education of girls excluding European schools	220
91. Average annual fee per pupil in girls' schools for general education (excluding European schools)	221

VIII.—EDUCATION OF SPECIAL COMMUNITIES.

(a) EDUCATION OF EUROPEANS.

92. Institutions for Europeans, by periods	222
93. Recognized institutions for Europeans, with scholars	223
94. Recognized institutions for Europeans, by sex and standard of instruction	224
95. European pupils in all institutions, by sex	225
96. European scholars in different classes of institutions, by sex	226
97. Expenditure on European institutions, by sources	227
98. Average annual expenditure from Government funds and average annual fee per pupil in European schools	228

(b) EDUCATION OF MUHAMMADANS.

99. Muhammadan scholars and population, with comparative percentages	229
100. Muhammadan scholars in institutions for general education	230
101. Muhammadan scholars in institutions for vocational and special education	231
102. Muhammadans under instruction in different classes of institutions, by periods	233

IX.—UNRECOGNIZED INSTITUTIONS.

103. Unrecognized institutions by provinces	235
